This product has been discontinued

Yeah Racing Li-Po Racing Pack 7.4V 5000mAh 25c

Description:

?This new li-po battery (LP-0050) is specifically developed for all 1/10 explosive RC cars. It makes the cars perform speedy! Most of the RC drivers comment it is a MUST buy item especially for the competition! The process of installation is very simple and time-saving which applies to all RC cars. Just strengthen your car with this powerful li-po battery!

Feature:

?For: 1/10 RC Car

Specification:

?Discharge rate: 25C

?Capacity: 5000mAh

?Voltage:7.4v

?Length: 138mm

?Width: 47mm

?Height: 26mm

?Net: 305g

Why go Li-Po

Why go Li-Po?

?Runtime up to 30% longer than traditional NiMH/NiCd (of the same capacity).

?Weight up to 40% lighter than traditional NiMH/NiCd (of the same capacity).

?Li-Po power delivery ensures maximum power throughout the discharge cycle.

?Less internal resistance offered by advanced cell fusion technology.

(#LP-0050) Li-Po Racing Pack 7.4V 5000mAh 25c with case

?Less energy lost in form of heat makes a greater power output.

?Complicated maintenance-free or conditioning-free.

?Balancing port included.

?Compatibles 90% of 1/10 scale chassis with little or zero modification.

?Can be used and recharged unlimited times per session.

?Less cost over time as longer lifespan up to 10 times that of NiMH/NiCd.

?Sealed case makes perfect for tracks looking.

Caution:

For your safety, please read the instruction before use.

Datasheet

In addition, please make sure that other series of Li-Po Battery Pack within the positive and negative sides or wires are certainly correct before using. You are welcome to inquire us about the subject.

Battery Charging:

Users should charge the battery within 0.5C rate for the first 8 to 10 sequences.

Subsequently, 1C rate charging is good to maintain the lifespan of battery.

Of course, users may use higher C rate to charge but it will affect the battery performance even life cycle is still short.

Therefore, we recommend all users should follow the above instruction of battery charging.
