?Type of Drive Insert: Phillips

?Qty: 10pcs

Why you need Titanium Screws

Titanium, when pure, is a lustrous, white metal. It has a low density, good strength, is easily fabricated, and has excellent corrosion resistance. Titanium is as strong as steel, but 45% lighter. It is 60% heavier than aluminum, but twice as strong.

Titanium screw is a perfect device for professional RC driver, like you, to make your RC car lighter in weight, and consequently run faster to beat your pals.
