

### Yeah Racing Ultra Fine 2 in 1 Ride Height & Droop Gauge (BK) for all 1/10 touring cars (#YT-0068BK)

Model : YT-0068BK

Yeah Racing Ultra Fine 2 in 1 Ride Height & Droop Gauge for all 1/10 touring cars #YT-0068BK

#### Description:

This is an ultra fine ride height and droop gauge for 1/10 nitro and electric touring cars.

Unlike the normal ride height gauges, which offer only increments of 0.5mm; this ride-height measurement offers super-precise increments of 0.2mm! The measurement ranges from 3.6mm to 8mm, allowing very precise adjustment of the front and rear ride height.

The suspension droop can be easily measured by rotating it 90 degrees. The stepped surfaces range from 1mm to 9mm. Stepped surfaces from 5mm onwards provide 0.2mm increments for fine adjustment!

This tool is CNC-machined from high-quality aluminum, giving it a lightweight and shiny outlook! It's a must have for all RC enthusiasts!
