

Light Kit > (#LK-0034) 2 Channel Programmable LED Lighting System For 1/10 RC Car

(#LK-0034) 2 Channel Programmable LED Lighting System For 1/10 RC Car

Model : LK-0034
(#LK-0034) 2 Channel Programmable LED Lighting System For 1/10 RC Car

Description:

Simple R/C LED light kit solution with this unit, sort out which lights you want to blink and which you don't by plugging them into each of the slots. The case is made of a sturdy yet lightweight plastic which will allow for easy installation on bodies without over burdening your car! The LEDs are programmable and controllable through your radio for your convenience!

The LED bulbs can be exchanged which makes changing the colors very simple, with Futaba connectors which can be swapped out for different lengths which makes installing this kit in any body a possibility!

Specification:

?10 LED Cable slots
?Box Color: Red
